

EZ AIR

Pyramid Air Solutions introduces the most versatile and effective residential and commercial air cleaners on the market today. The EZ Air is a multistage air cleaner combining Certified HEPA filtration and Activated carbon. Each HEPA filter is individually tested, certified and guaranteed to perform at 99.99% efficiency for maintenance, .3 micron particulate matter. Designed for quiet operation and easy, low-cost EZ Air changes the way you live and breathe in your home and office.

Removes dust, pet dander, allergens, and mold that cause respiratory ailments

SPECIFICATIONS

DIENSIONS AND WEIGHT

15"W X 15"D X 19"H, 38 lbs.
381 X 381 X 482 mm, 17 kgs.

AIR FLOW

Full Variable Speed Control, 350 cfm/595 CMH on High

ELECTRICAL

220V-240V/50Hz @ 0.5 amps

TECHNOLOGY

Filters

PREFILTERS:

Disposable prefilter to capture large particles
Carbon pack with 3.5 lbs. 1.6 kg of activated carbon and zeolite
Two carbon filters for a year's supply is included with each unit.

HEPA FILTER:

14" X 14" X 3 5/8"/355 X 355 X 92 individually certified as 99.99% efficient @ .3 microns.

POSTFILTERS:

14" x 14" x 3/4" Carbon Pads

CONSTRUCTION:

Heavy Duty 20 gauge steel cabinet on four durable 2" hooded casters, with convenient panel access to all replacement parts. HEPA filter is completely sealed against the unit casing to prevent any bypass of unfiltered air into the discharge side of the unit. Standard powder coating is Black, White or Sandstone.

Exclusively Distributed in Asia by:

CERTIFIED HEPA FILTRATION: Individually certified HEPA filter with 80 square feet of media airborne dust, allergens, particulate and mold with hospital grade efficiency. All filters are individually tested and certified to guarantee 99.99% efficiency at .3 microns, and they are mechanically sealed within the cabinet to prevent air bypass. This allows EZ Air to operate at HEPA efficiency and need replacement only after every 3 years.

PRE-FILTER: Disposable pre-filter captures all large particles from going through thus extending the life of the second stage activated carbon pre-filter and that of the HEPA filter.

ACTIVATED CARBON: Three and a half pounds of carbon and zeolite are incorporated into the second stage prefilter to remove harmful odors, chemicals and gases. Low Prefilter costs encourage carbon replacement to maximize unit odor and chemical adsorption efficiency.

KEY FEATURES:

- ▶ 5 Stages of Air Treatment
- ▶ Disposable prefilter helps extend the life of the Carbon zeolite pre-filter and the HEPA filter.
- ▶ Certified HEPA filter is guaranteed to remove dust and particulates (99.99% efficiency @ .3 microns). Filter has steel frame to ensure disintegration.
- ▶ Easy Access to all filters - No tools required
- ▶ Indicator Light Monitor the life-span of HEPA
- ▶ Full Variable Speed Control Allows Quiet Mode
- ▶ 4 heavy duty castors allow portability .
- ▶ Three way directional intake and exhaust distributes and cleans air throughout the room.
